BBA AVIATION ANNOUNCES SALE OF OXFORD AIRPORT

BBA Aviation plc today announces the completion of the sale of Oxford Aviation Services Limited, trading as Oxford Airport to OA Acquisitions Limited (a privately owned company) for a debt free cash free consideration of £40 million. This will produce an exceptional profit on disposal of approximately £24 million, which is expected to be tax free.

Oxford Airport, a small regional airport based 6 miles north of Oxford city centre, has been owned and operated by BBA since March 2000. In the year ended 31 December 2006, the Airport had a turnover of £4.5 million, operating profit of £0.3 million and gross assets of £11.0 million.

Commenting on the disposal, BBA Aviation's Chief Executive Simon Pryce said:

"The sale of Oxford Airport has been completed at an attractive price to BBA Aviation and the disposal will be immediately earnings enhancing. Together with the sale of Oxford Aviation Training, that was announced last month, BBA has now realised a total value of £77 million for both assets, which will be re-invested in our core Flight Support and Aftermarket Services and Systems divisions."

Notes to Editors

BBA Aviation is a world leader in aviation services focusing on Aviation Flight Support and Aftermarket Services and Systems. BBA Aviation provides flight support services for corporate and commercial aviation customers as well as maintenance, repair, overhaul and spare parts for aircraft engines. It also supplies aviation components, landing gear and hydraulic systems. These are attractive niches in a \$250 billion market with clear barriers to entry, where BBA has leading positions, well-known and reputable brands and a proven track record of organic and acquisition-led growth.

BBA Aviation was formerly part of BBA Group, but following the demerger of Fiberweb, in November 2006 it became a stand-alone aviation services business.
