

HEALTH, SAFETY & ENVIRONMENTAL MANAGEMENT

MISSION STATEMENT

It is our intention to conduct business in a manner that protects public and occupational health, the environment and employee safety, whilst maintaining quality, productivity and profitability, and promoting business growth. We are proactively committed to the continual improvement of health, safety and environmental processes and performance, and to the identification, evaluation and elimination of hazards that could cause harm to people, property and our environment.

Total commitment from all levels of management is essential for the success of an effective Health, Safety and Environmental Management Programme. Such commitment and leadership must be visible throughout BBA, with accountability demonstrated at every functional level of the organisation. Therefore, within each BBA Aviation company:

- Management will lead by example.
- Issues associated with Health, Safety and Environment will be held of equal importance to, and integrated with, other business objectives.
- Systems will be in place to engage, train, develop and maintain competent and informed personnel.
- A written policy statement and compliance programme will be established and implemented that includes development of HS&E procedures and performance objectives, measurement of performance against the established standards, and individual responsibility and accountability.
- A process for ensuring continual improvement of the high standards of HS&E programmes and performance will be maintained.
- An atmosphere fostering total employee involvement and open communication in the HS&E processes will be developed encouraged and maintained.

January 2007

Michael Harper
Chief Executive Officer
